Summary

Long-time Linux sysadmin and recent Full-Stack Bootcamp graduate. Dedicated, hardworking, and eager to put skills to use developing **React**, **React Native**, and **Node.js** applications to extend companies' reach and engagement with end users.

Projects

Manciple
React Native, Redux, Socket.IO, MySQL

A shopping list app that syncs lists with other users via a central server. Features purchase history, automatic adding of frequently-purchased items, item collections, and more.

github.com/fossmanjack/manciple-rn

AnonChat
React, Node.js, Express, Socket.IO

A proof-of-concept IRC clone written in React and Node.js. Uses Socket.IO to transfer messages in realtime among connected clients.

github.com/fossmanjack/anonchat

Seneschal
Node.js, Express, MySQL, Passport

Supporting server for Manciple and, eventually, other household management projects. Uses MySQL and Passport to manage users and user data.

github.com/fossmanjack/seneschal

Nextcloud Codex
React, WebDAV

A long-form writing app featuring an integrated wiki and WebDAV saving, versioning, and compiling to LaTeX or markdown format.
